## **Site Risk Assessment Record**

Location: Foxholes	Date of assessment: 17/1/2017		Nearest postcode: OX7 6RW	Main entrance OS Grid Ref: SP 25703 20737 (west) SP 25902 20927 (east)	
Hazards/hazardous events	Who is affected?	Typical outcome	Precautions	Risk Level LxH=RL	
Uneven ground due to roots, stones, holes and muddy paths causing slips, trips or falls.	Public. BBOWT workers	Bruises, sprains, minor cuts and grazes.	Maintain path surface.	Slight	
Thorny bushes along paths and in work areas.	Public. BBOWT workers	Cuts and grazes. Infections. Puncture wounds, eye damage.	Ensure paths are kept clear. Provide safety glasses if working in thorny area.	Slight	
Horses. A number of bridleways cross reserves – possibility of horses being scared.	Public. BBOWT workers	Head injuries to the rider, from falling off. Injury to passer by from horse kicking.	Put up suitable signs when work is being done. Be aware of danger when on walking on bridleways.	Slight	
Falling dead wood in the form of either branches or trees.	Public. BBOWT workers	Head injuries, broken limbs, cuts and bruises.	Conform to COP 31 and carry out tree safety assessments and remedial work required. Areas used/worked in are to be checked for dangerous trees. No work should be carried out in high winds.	Slight	
Irritable and poisonous plants such as bracken, berries and fungi.	Public. BBOWT workers	Spores are carcinogenic. Poisoning from ingestion.	Do not work in bracken infested areas in July/August/September. Do not eat fungi, berries or other plant material. Wash hands after handling such material.	Slight	

Unlikely
Likely
Very likely

Slight harm	Harmful	Very harmful
Trivial	Slight	Moderate
Slight	Moderate	Substantial
Moderate	Substantial	Intolerable

Stings from bees, wasps or hornets.	Public BBOWT workers	Allergic reaction to stings.	Be aware of any nests close by and do not get too close. All volunteers / staff should declare any known allergic reactions.	Slight
Dog faeces.	Public. BBOWT workers	Stomach upset from bacteria in faeces. Toxocarias (an infection of the round worm <i>Toxocara cani</i> ). Young children are at particular risk due to their weaker immune systems and greater chance of exposure.	Wear gloves if likely to come in contact with faeces. Wash hands before eating.	Slight
Water bodies.	Public. BBOWT workers	Drowning.	Access to water bodies to be discouraged. Route path away from edge of water body.	Moderate
Contact with water.	Public. BBOWT workers	Weil's disease (Leptospirosis).	Cover cuts and abrasions and wash hands after contact with water. If flu like symptoms develop within 3-19 days after contact with water visit doctor and inform of the possibility of Weils' disease.	Moderate
Hogweed.	Public. BBOWT workers	Blisters from a photosensitive skin reaction.	Avoid contact with plant especially when cutting. Wear gloves. Keep paths clear of the plant.	Slight
Underground service lines.	BBOWT workers.	Electrocution.	Inform workers of the presence of underground service lines.	Moderate

Slight	Moderate	Substantial
Moderate	Substantial	Intolerable

Ticks present.		Public. BBOWT workers	Contr	racting Lyme's ise	Wear appropriate clothing to cover the legs. Arm coverings should be cuffed to help exclude ticks. Workers should inspect their skin for ticks when bathing or showering after work. Any tick bites which do not heal at a normal rate, develop an associated rash, or if any part of the tick cannot be removed from the wound, consult a doctor immediately. If symptoms of ill-health follow a bite, also consult a doctor without delay. (COP 15)	Slight
Deer Control used on site		Public, BBOWT workers	Guns	shot wound.	Inform stalkers to only shoot well away from pathways and aim down on ground. Shoot only early mornings and dusk when less chance of coming across public	Moderate
